

iControl

*remote control your production

You love iStopmotion, but you hate going over to your computer to adjust or snap the next frame in your clay epic, well I just made this for you (OK, for me, but I'm giving it to you). So just transfer iStopmotion.hid to your SE (via bluetooth) and you are set to go. Fire up iStopmotion and use your cell phone as a remote control. Nice:-)

Value	Key
Preview overlay	
Cmd + 1 (None)	1
Cmd + 2 (Half)	2
Cmd + 3 (Full)	3
Onion skinning	
Cmd + alt + 0 (Off)	4
Cmd + alt + 1 (One frame)	5
Cmd + alt + 5 (5 frames)	6
Blinking	
Cmd + 4 (Off)	7
Cmd + 6 (Slow)	8
Cmd + 8 (Fast)	9
Save	
Cmd + s (Save)	0
Movie commands	
Cmd + r (Capture frame)	Left selection key
Cmd + Backspace (Delete frame)	Right selection key
Cmd + Shift + f (Present movie)	Pressing the navigation key
Left arrow (One frame left)	Pressing the navigation key left
Right arrow (One frame right)	Pressing the navigation key right

Overview of all corresponding short cuts, laptop /cellphone

Sure you can use the Apple remote, but hey, I don't have one. And let's face it, it's not packed with buttons. Your phone is stuffed with 18 (plus) buttons. If you feel the remote is missing a short cut, please drop us a line. We got nothing else to do. If it doesn't work, don't call us.

REQUIREMENTS

- iStopmotion, Boinx.com
- SonyEricsson mobile
- Bluetooth enabled Mac

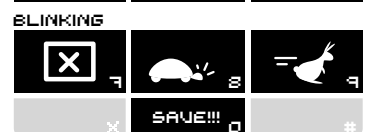

1 Download
iStopmotion.hid to your Mac.

2 Upload
iStopmotion.hid to your Sony Ericsson.

3 Create
your fantastic iStopmotion movie.

FEATURES

- ✓ 15 short cuts
- ✓ Includes save and delete

[DOWNLOAD the remote!](#)
