

*iSight and iPod video recording

You have an iPod and you have just bought an iSight, well now you have a video recorder for the road. Just install iSight2iPod on your Mac and iPod. Record your movies to the iPods hard drive. Take both still photos and up to 15 minutes of continues video clips with audio. The "camcorder" is controlled with the superb user interface of the iPod. Push the button, ACTION!

Already you love iMovie and iPhoto, well say Hello to iSight2iPod! This software you will love for sure. Arrange, save and view your photos and video in an iTunes style environment. Convert and save your footage in Quicktime supported formats. Burn your collections to cd or dvd within iSight2iPod.

iSight2iPod is in it's final alpha testing, a public preview will be made available in the near future. Send us an E-mail to be the first iSight2iPod user.
